

September 2001

# TINKER VIEW ACRES

## UPDATE

SERVING OUR NEIGHBORS

Meeting Community Needs

The following information is current as of 30 September 2001. In the event of limited update information for the month, it may be necessary to publish this *TVA Update* on a bimonthly basis instead of monthly. We will make our best attempt to keep you informed of happenings in your neighborhood. Please feel free to contact us with you questions or concerns (see reverse side for contact information).

- **Good News!** Coon Engineering, the contractor hired to design the city water connection, has completed the design. Construction is set to begin by early November. The construction contractor has not yet been determined.
- Within this construction contract, nine fire hydrants are to be installed in the Tinker View Acres subdivision.
- Monitoring well sampling in your neighborhood continues to occur. In early August, all seven monitoring wells were sampled and results will be available in the near future.
- **FYI:** Due to a population density survey conducted by Williams Gas Pipelines Central, Inc., it was determined that an existing 24-inch gas pipeline must be replaced to adhere to Department of Transportation Pipeline Safety Regulations. Therefore, in the near future you may notice some construction being done in the southwest area of Tinker Air Force Base.
- To date, 20 residents have requested and are receiving bottled water. If you would like bottled water, please do not hesitate to contact Mr. Brion Ockenfels.
- The Oklahoma Department of Environmental Quality (DEQ) has been conducting occasional sampling of private water wells equipped with filtration systems. After a few minor adjustments, they report that the systems are working well. Mr. Robert Replogle may be contacted for further information at (405) 702-5100.
- The Oklahoma DEQ along with the Environmental Protection Agency (EPA) and the technical subcommittee of the Community Advisory Board (CAB) will be reviewing the Resource Conservation and Recovery Act (RCRA) Facility Investigation or RFI in December 2001. This RFI will be the government's official report detailing the nature (what is found) and extent (where it is found) of the groundwater contamination in the Tinker View Acres neighborhood.
- The Final RFI is scheduled to be available for Public Review in February 2002. The Final Report will be placed in the Information Repository at the Midwest City Public Library.
